I, _____, do not hold Onslow Water & Sewer Authority or any other agent or representative thereof responsible for any damage that potentially could occur from having my water service turned on at the above referenced property. Onslow Water & Sewer Authority shall not be liable for damage of any kind whatsoever resulting from turn on of water service or the use of water on the user's premises, unless such damage results directly from negligence on the part of Onslow Water & Sewer Authority. Onslow Water & Sewer Authority shall not be responsible for any damages done or resulting from any defect, leak, or broken lines in the piping, fixtures or appliances on the user's premises.

Onslow Water & Sewer Authority highly recommends that a responsible person is at the home when water service is turned on. It is your responsibility to ensure that all water faucets are off and there are no leaks during the turn on procedure. If you have a hand gate valve on your waterline it is highly recommended the gate valve be in the off position.

Should your gate valve not be secured or not functioning properly, a faucet/spigot open, or a toilet running water, your water will be turned back off at either the gate valve or the meter. If your hand gate valve is not functioning properly or unable to be located, the meter will be turned off. If a second trip to turn on the meter is requested, a Service Call fee will be assessed. If the second trip is required or requested, any applicable fees will be assessed per the rate and fee schedule.

If the customer requests cancellation of the connection, the amounts paid for work already performed are not refundable. Once the service has been activated, the system development fees are not refundable.
